TAFT'S POLICY IS UNCHANGED

Awaits Decision In Oil and Tobacco Cases

LAW MUST BE OBEYED

Trusts and Combines Operating Illegally Must Change Their Methods

That President Taft has not grown lukewarm or wearied of his trust busting campaign was evidenced by his remarks to certain recent callers at the white house. A special to the Globe-Democrat gives the following:

"With the beef trust already under fire and the Standard Oil and American Tobacco Company cases in the hands of the Supreme Court, it was made known today by callers at the white house that the administration is planning a crusade of trust busting such as this country has never seen since the passage of the Sherman anti-trust law, about twenty years ago.

"President Taft, it was made known, is waiting only for the decision of the Supreme Court in the Standard Oil and tobacco cases before he begins his campaign against the trusts. He is firmly convinced, it was declared, that the highest tribunal will decide against the oil trust and the tobacco trust, and after that he intends it would be to begin the prosecution of every illegal combination which he can find.

"Already, it was made known, the Department of Justice has started investigation of many corporations which it believed were operating in restraint of trade. It could not be learned just what corporations the department is probing, but it was stated that any suspected of controlling prices or unjust discrimination and illegally maintaining a monopoly of any product are subject to inquiry.

"If necessary, it was said, the administration will greatly augment the force of special counsel and investigators of the Department of Justice. It will procure all the talent the president thinks the campaign he is about to launch will demand.

"President Taft, it was asserted, was tired of having reports go out that he has changed his mind, he was more firmly convinced than ever that he must proceed and must keep to the pledges he made publicly in respect to the enforcement of law and the breaking down of monopolies and illegal combinations.

"The president has been waiting for the decisions of the Supreme Court in the oil and tobacco cases, not because he feared that they will be adverse, but because he believed, it was said, that they will be favorable to the government. It will then be a plain matter of duty with the administration to begin further prosecutions."

Monorail Success Assured

The success of the monorail and the recent tests of a full-sized car of this type are discussed in an illustrated article appearing in the February number of Popular Mechanics. The article states: "The tests of the car were made on a track 1,980 ft. long, 440 ft. of which, was laid in a circle, while the remaining 1,320 ft. was a straight stretch. The wheels of the car, as is shown in one of the illustrations, are four, mounted two and two in two in-

dependent tandem trucks. When on a straight track all the wheels are, of course, running in a straight line, but, as the center pins of the trucks are connected to the body of the vehicle by means of ball bearings, there is considerable flexibility in rounding curves. So much, in fact that reverse curves of 35-ft. radius were readily negotiated. "The car used in the tests consists of a platform 10 ft. wide and 40 ft. long, at one end of which is a cab containing the propelling and controlling mechanism. The propelling machinery consists of two gasoline engines of practically the same type as an automobile engine, one being rated at 80 hp. and the other at 20 hp."

Undertaking Business Sold
 The Bockson-Newton Undertaking company recently purchased the business of the Drain-Melone Undertaking company. The latter named has been serving the people here for several years with the utmost satisfaction to their patrons and only quit the field at this time on account of Mr. Drain finding the work more than he can attend to in connection with his other interests. The purchasing company has also been in business for sometime here and its service will continue to be satisfactory to patrons as it has been in the past.

HOT SPRINGS HOTEL DESTROYED BY FIRE

Ninety Two Guests Aroused Early Sunday Morning—All Escape

Hot Springs, Jan. 23.—The New Waverly hotel was completely destroyed by fire early this morning. Although there were 92 guests in the hotel at the time of the fire, and all had retired for the night, every one escaped without injury. All lost their clothing, however, and the stores were opened this morning, in order that they might secure new outfits. The majority of the guests were forced out in exceedingly scanty attire.

The fire broke out at 2 o'clock this morning. The building was a frame structure and the flames spread rapidly. The fire was discovered by Night Clerk Scott Klinnich, who realizing the danger of the guests, started on a whirlwind tour of the entire building.

He stopped at every door long enough to thoroughly arouse the occupant of the room and when the room of an invalid was reached, special attention was given, and all of the helpless were carried down the steps.

The guests made their exit by means of the stairways, as the elevator shaft was a solid sheet of flames.

The hotel was one of the most important in the city. The loss is considerable.

The bath house, operated in connection with the hotel, was also destroyed.

Elks Have Initiation

Wednesday evening of last week witnessed some fall capers in the reservation of the B. P. O. E.'s in this city. There was a class of six initiated into the mysteries of the lodge—the largest class in the history of the local lodge.

Owing to the dimensions of the occasion each member was there for the sole purpose of making it an occasion to be remembered by the candidates and if rumor may be credited the affair was a success.

The following were the candidates: Dr. W. H. Buckley, Maj. J. T. Waddill, R. C. Slater, Frank Wallace, Ervin Clayton and C. W. Connor. After the initiation, the participants enjoyed a banquet.

An Aviation Jingle

Dr. J. B. Ellis a brother of Dr. C. F. Ellis whom many remember used to practice here sends a letter from Long Beach, California, in the following jingling style after viewing the great feats at the aviation meet at Los Angeles.

Coming Home To Arkansas

I suppose you've been a readin' 'bout the areoplanes and things,
 That are flyin' through the heavens, like vehicles with wings—
 They've been sailin' over the orchards a score or more at least,
 And I'm goin' to build one of my own, and take a trip back east.
 So keep your optics turned toward the gold tipped western sky
 And you'll see me sailing homeward in an airship by and by.

And when I start to flyin', you bet I'll set the pace
 For the eagles, and the pigeons, and all the swift winged race,
 I'll break all the laws and ordinances 'gainst speed that ever were,
 I'll just fade from where I now am, and appear again elsewhere.
 So keep a gazing westward at the yellor sunset sky,
 For I'm coming back to Arkansas in an airship by and by.

There'll be no limit to my speed when I begin to fly,
 There'll only be a dark streak in the air as I pass by—
 All the birds and other beasts will fly in terror from the sight
 And I fear that many natives will be droppin' dead from flight,
 But I'm goin' to make a record—burn a streak across the sky,
 When I return to Arkansas in an airship by and by.

I'll eat my breakfast here at home, at the regular time o' day,
 And I'll probably eat a luncheon at some point about midway—
 But I'll be with you at the proper time to share the evenin' meal,
 So remember that I'm coming, and prepare the fattened veal.
 Just keep your weather eye upon the golden western sky,
 For I'm comin' back to Arkansas in an airship by and by.

TWO LADIES FOUND IN PITIFUL STATE

Death Relieves One Soon After the Discovery

Mrs. C. F. Humphrey and Sister Found Ill and Unattended In Home

On Wednesday of last week, Mesdames Whiting, Clayton and Turner of Spring street, found Mrs. C. F. Humphrey and her sister, Miss Eliza Williams, both in a critical condition at their home which they occupied alone. The elderly ladies were both quite ill—Miss Williams so seriously so that death relieved her not long after the discovery. Although Dr. Floyd was immediately called and did all in his power, the patient had not vitality enough to survive. Mrs. Humphrey under the kind ministrations of the physician and neighbors was soon made comfortable.

The ladies had occupied the large and handsome home alone since the recent death of Mr. Humphrey. Their preference was for a secluded life and neighbors thought nothing of not seeing them for days at a time as they occupied the lower and back portion of the home. It was only when the water deliveryman had failed on two visits to get any response that an investigation was had with the above results. Dr. Floyd notified relatives in Illinois of the condition of things and on Friday evening a nephew

ARKANSAS THE DIAMOND STATE

Governor Donaghey Writes of Resources

Has Everything Produced Elsewhere and Some Exclusively Her Own

Governor Donaghey writes in Colliers of the state of Arkansas as follows: "Nature having endowed the South with every resource possible, it can not but follow that within the next twenty years, or perhaps within a shorter period, it will be the most productive section of the world, and one of the wealthiest.

Among these Southern States I am firmly convinced that Arkansas will lead the rest, both in varied resources and productivity. It possesses all the resources that are found in other Southern States, and has some that are nowhere present in any other State in the Union. These exceptions are the diamond fields of Pike County and the inexhaustible deposits of bauxite, in Pulaski and Saline Counties, the largest in the world. It has more running streams from which hydro-electric power may be generated than any other State, some of which are now being harnessed that power may be secured from them for the operation of interurban lines. It produces 147 minerals, the greatest of which is zinc, and has deposits

of exhausted for ages to come. With its immense beds of marble, granite, limestone, slate, and the chalk deposits of Little River County, the largest in the United States, it is prepared to furnish the building material for the entire country. Its forests of pine and hardwood timber and its various clays adapted to the manufacture of everything that is produced from clay, from chinaware to fire-proof brick, adds greatly to its wealth.

Its agricultural and horticultural resources have already placed it to the forefront as an agricultural state. Within less than five years it has become one of the leading rice-producing states of the South. Its fruit, especially apples, peaches, and strawberries, is the best produced in the United States. There are no better lands for the production of cotton and corn than the lands of Arkansas.

I predict that within the next twenty years the South will manufacture all the cotton it grows, and that Arkansas will be one of the leading cotton manufacturing states of this section. From a commercial view, I regard the future of the South as the brightest of any section in the world, and when all the industrial problems in this locality are worked out, Arkansas will be the center of the manufacturing states of the South."

PINCHOT HEADS CONSERVATION ASSOCIATION

Dr. Charles W. Eliot Quits, In Favor of Deposed Forester

Washington, Jan. 23.—The election of Gifford Pinchot to succeed Dr. Charles W. Eliot as president of the National Conservation Association was announced today. Dr. Eliot retains the honorary presidency. Mr. Pinchot takes active charge of the association tomorrow, the headquarters to be in Washington.

Two weeks ago Dr. Eliot wrote to the executive committee of the association expressing his opinion that Mr. Pinchot as the recognized head of the conservation movement, should take the active leadership of the association.

He wrote Mr. Pinchot a personal letter, suggesting that he accept the place. At Dr. Eliot's direction, a meeting of the association was held and Mr. Pinchot's election followed.

Edison Again Triumphant

New York.—After years experimenting in the direction of a practical storage battery system for street cars, a model car thus propelled was pulled out of the shops of Mr. Thomas A. Edison in Orange, N. J., and run on an ordinary car track to the satisfaction of Mr. Edison and his friends.

There is about a mile of unused track at the foot of the Orange Mountains on the Orange and Passaic Valley line between Washington street and the car barns which was put at the disposal of Mr. Edison.

The run of a mile to the car barns was made at good speed, without a hitch. The car ran like clock work, with no jars or vibrations to speak of. The storage batteries gave the car a speed of 20 miles an hour, even up to the 4 per cent grades of the road.

Bergdorf-Pike

Mr. John Bergdorf and Miss Edna Pike were married on Sunday by Judge H. M. C. White. The bride is the 18 year old daughter of Chief of Police Pike and the groom the son of Geo. W. Bergdorf the Main Street grocer. The groom is only slightly older than the bride.

COURTS OCCUPY MUCH ATTENTION

Chancery at Berryville and Probate Here

ATTORNEYS ARE BUSY

Many Leases Against the Railroad at Coming Term of Circuit Court.

The convening of chancery court in Berryville and probate court in this city on Monday caused quite a little confusion for attorneys who had business before each bar and resulted in some close calculating to accommodate the greatest number.

On Thursday afternoon of last week chancery court took an adjournment until March 4th at which time several cases will come up that have been passed at this sitting. The following cases were disposed of since last week's issue of the Times:

Monagan Plumbing Company vs City of Eureka Springs; demurrer overruled and plaintiff given ten days in which to file a response.

In the case of C. F. Ellis, L. P. Badger and W. I. Sanford vs W. M. Duncan and M. D. Jordan, the cause was dismissed by agreement, each party to pay half the costs.

Calvin Meador vs W. J. Meador et al; cause continued.

J. C. Meador et al vs August Wewe et al; cause dismissed, a report of attorney for non-resident filed.

A. N. Matthews vs Susie Crump et al; judgment against A. M. Crump for \$379.20 and costs.

A. N. Matthews, ex parte; decree quieting title as to lots 6 and 6; cause continued as to lots 5 and 5.

Charlotte James and Essie Butt vs B. A. and Fannie Langston; sale confirmed and deed approved in open court.

Louis Hance vs Josie L. Reed and Mrs. M. T. Mack; sale of commissioner approved and deed acknowledged in open court.

Ida Lane vs Laura and Fred Boles; cause passed for proper service.

W. C. McKaig vs J. James and Ellen O. James; sale approved and deed acknowledged in open court.

Leila Hill-Owen et al vs A. N. Matthews et al; action dismissed as to A. N. Matthews; deferred for further service.

Mary M. Cunane, ex parte; Continued on Page Four.

Birthday Surprise

On Thursday evening of last week Mrs. Z. P. Freeman was much surprised when quite a number of her friends took possession of her home. She was soon reminded that it was the 69th anniversary of her birth and that the friends had come to offer congratulations and remembrances.

Mrs. Freeman's daughter, Mrs. Didea, and a number of the ladies had so quietly planned the affair that no inkling had reached the mother. A most pleasant evening was spent and enjoyed by all. Delicious refreshments were served. The following were present:

Mesdames Meador, Jones, Arbuckle, Greenup, Johnson, Petty, Kelley, Kerr, Clark, Vandever, Bradley, Ruble, Chandler, Hopkins, Dudley, Williams, McCutcheon and Sawyer.

THE EUREKA SPRINGS TIMES

L. E. BAIRD, Editor and Manager. Successors to the Weekly Times-Echo. Times established 1881. Echo established 1885. Published every Thursday by the Times Publishing Company of Eureka Springs, Arkansas. A Newspaper devoted to the interests of Eureka Springs, Carroll County and the Republican party. Entered at the Postoffice at Eureka Springs, Arkansas, as second-class mail matter.

SUBSCRIPTION ONE DOLLAR THE YEAR.

THE TREASURE-SEEKERS

One sought the east for gems and found, alas Dire failure was his most unhappy pass. One sought for pearls in the waters of the Ind, And sank a victim of the seas and wind. Another sought the gold that glitters free Upon the strand far in the Northern sea, And on the beaches of that land of white His bones lie resting in the endless night. A fourth plunged in the nearer fray to win The gaudy raiment that the Trade-Elves spin, And at the last found coffers full of dross— The gold was profit, but his soul was loss! For me in fortunes strife, give me the part Of him that delves deep in the Mines of Heart— Not far afield, but here let me secure From them that love me treasures that endure.—John Kendrick Bangs, In Success Magazine.

COMMISSION GOVERNMENT

Still the sentiment for commission form of government grows and in it may be seen the possibility of the downfall of the ward healer, the pie hunting politician and the political grafter. There seems a possibility for the city having the commission form of government, that the people's money may be spent for the people and that the pesky little parasitic grafter, as well as the bigger ones, may be relegated to the dim and distant past. If such a thing can be accomplished by the commission form of government the cities of Arkansas certainly need it.

Recently at Lexington, Ky., a mass meeting was called by the commercial club and resolutions were adopted favoring the commission form of government. Legislative action will be necessary before the proposed new charter can be adopted and a meeting has been called for the near future at Lexington, at which it is expected there will be delegates from all the principal cities of the state, the object being to take the whole matter under consideration with a view of securing the necessary legislation.

Memphis, Tenn., is ready to enter upon the experiment. Her charter granted by the last state legislature. This charter is similar to those under which Galveston and Houston, Tex., are governed and places the entire management of the city's affairs in the hands of the mayor and four commissioners. Almost a similar plan is proposed for Chattanooga.

The legislature of Mississippi passed a law in 1908 providing for commission government. As yet no Mississippi city has adopted it, but Hattiesburg is now agitating the question and proposes asking for a charter under which the city will be governed by a mayor and three commissioners, all to be elected from the city at large without regard to ward lines.

The Times suggests that the matter be taken up in the proper way to secure the privilege of commission form of government for Arkansas cities. A better form

of municipal government for the cities of the state is certainly needed.

The Times advocates the putting a tax of one cent on every gallon of water shipped out of Eureka Springs.

Seattle, Wash., is asking for a constitutional amendment providing for a commission plan of government.

Is it not time the city affairs were put in the hands of men who will give them business consideration and not make the office a stepping stone to boost political fortunes?

A tax of one cent per gallon on water shipped out of this city would furnish a splendid fund for beautifying our reservations and furnishing music during the summer.

In round numbers the city of Chicago pays \$50,000 per annum for the street car riding of her "plain clothes" policemen. This means 1,000,000 rides per year by about 100 men.

If the United States government owes the state of Arkansas \$1,000,000, let us have it by all means and especially if it is to go into "good roads" fund of the state. We could use a few good roads.

The land wide revolt and the various investigations, both by states and the United States government, and the protests by numerous organizations, should have the effect of locating the blame for the high price of living at this time. When the American people become thoroughly aroused they will go to the bottom of things and facts will stand out boldly.

The only thing charged against the republican party, and a wrong charge at that, is the high prices. But it is found that even higher prices prevail in England, France and Germany, with the difference that over there the people simply have to go without while here nearly every one has the means to live comfortably and well. Prices them-

selves are not the result of republicanism, but having the price is, and that is why the people sustain the republican party and will continue to do so.—Ex.

From the present workings of the "robber tariff," it is evident that the democrats will be without a paramount issue in the near future.

Gentle reader, don't you accredit Arkansas prosperity to democratic rule. Our vast coal, lumber, mineral fruit, rice and cotton industries are making the state rich, but every day is reducing our resources. Elect men who will not waste your revenues but will protect and promote home growth and development.—Salem Sun.

In other words elect republicans.

Can any one give a good excuse for giving away any franchise of the city? Especially can anyone defend the giving any one or any company the privilege of shipping Eureka Springs water? It is a "cinch" that people will not visit this resort, if they can get Eureka Springs water in their own comfortable homes. If such franchise can not be revoked, then place such a tax on each gallon shipped as will compensate the city for its loss of visitors.

The ousting of Pinchot, the head of the forest service is one of the most trying ordeals the president has faced. It seemed to be a case wherein the man thought he was larger than his office, larger than the president. In some features Pinchot may be right, but the main charge is insubordination. The trouble grew out of his fight with Ballinger, and the charges of his subordinate Glavis, of dishonesty against Ballinger, whether true or not, were such as could not be passed over lightly, and it appears that Mr. Pinchot did not conduct himself with the dignity and straightforwardness as impressed the people favorably. His efforts to save the timber and protect the government's rights were commendable, but the question now is, was he sincere.—State Line Republican.

FARM AND FIELD

Hints For the Farmer and Stockman

All About the Farm

Clover sod put into corn always produces a crop of big ears. The farmer who plants by the signs of the zodiac may have to feed his stock on moonshine. Sweet potatoes yield about 90 bushels to the acre the country over, according to the department of agriculture. Commercial fertilizers are profitable when rightly used, but he is a poor manager who does not save all liquid and solid manures before buying that which comes in bags. Every young man or woman who expects to engage in farming or home making should seek preparation for his or her business by taking a course in agricultural or household science. The waste of farm machinery is something scandalous. Twelve carloads of scrap iron were recently shipped from one small western town, and it represented just so much farm machinery, which ought to be in good repair and serviceable for several years. Hope you have none wintering out of doors.

Seed Time

Now is the time to get seeds ready for spring planting. It is poor policy to wait until the last minute. The oldest and most reliable seed houses are now advertising freely and the ads. make interesting reading. Give any of them a chance early and they will return good service and furnish good seed. One good, lively seed is worth more than two poor ones. The labor of planting and cultivating is the same, the rent of the ground is practically the same with poor seed as it is with good seed, but the yield at harvest time is very different. There are instances on record

where pedigreed seed oats have increased the yield from six to eight bushels per acre over common seed in the same field under the same cultural conditions.

The same principle holds good in all farm crops, but it is hard to pick up superior seeds at the last moment when there is nothing but leavings to choose from.

A Money Saver

While more cream separators are being used each succeeding year, their real value is not understood by the average farmer. They are considered a sort of luxury, but the fact is, a good cream separator is too valuable to do without. If a man has more than two cows he ought to have a separator. It is worth all it costs simply to get the work out of the way quickly. Labor is about the most expensive commodity that farmers have to take into account, so that time is more expensive than machinery. Business like farmers who appreciate the value of time are the ones to buy cream separators.

The milk is handled but once and the cream is taken care of easily and the skim milk is fed while still warm so that the animals get the full benefit. Cold, stale milk is not worth half as much to a calf or a pig or a chicken as fresh, warm milk directly from the cow by way of the separator. A good separator will save its cost in cream alone, but it is the other features that should be considered first.

Skim milk is a splendid feed for young animals if it is handled quickly, but it loses its value rapidly during the cooling process.

Poultry Pickings

The song of the hen is an epic of good times. Learn to handle 100 chickens successfully before trying 1000. Most of the plants that are started up to make poultry in factory

PLENTY OF WATER

AT GREEN FOREST

Ozark hills seem to have plenty of water says Mr. Payne

A representative of the Times was informed by Mr. Tom Payne that their endeavors to sink the drill hole near Green Forest was proceeding as fast as the hard rock and the amount of water would permit.

Mr. Payne is a property owner in Eureka Springs and looks with great favor and feasibility of securing water for the city mains by the way of deep wells.

His experience at Green Forest is bearing out his belief. Many people are watching with intense interest, the water phase of the drilling at Green Forest.

He Resigned

The mayor of Van Buren is a candidate for a county office and in order to not neglect his duties as mayor he has resigned that office and will devote his time to his campaign at his own expense and not at the expense of his home city.

For Improvement of Roads

Washington.—The latest of numerous contributions to proposed legislation for highway construction in the United States is a bill by Representative Garner of Texas, appropriating \$10,000,000 among the states and territories, pro rata, according to mileage of the traveled public roads in the respective jurisdictions.

The fund, according to the secretary of agriculture after certification of the amounts needed, etc., and the amount allowed each state is not to exceed the state's own appropriation for road maintenance.

Tom Howerton is visiting his relatives near Grand View. A. E. Jackson is improving the rural route roads considerably. Mrs. W. D. Weaver is visiting her mother, Mrs. C. R. Burnett.

Charlie Burnett was visiting relatives near Grand View, Sunday. Tom Craubaugh, the candidate for assessor was in Grand View, Monday.

Lee Howerton and sister, Miss Alta, were guests of Miss Nellie Hall, Sunday.

Rev. Tuck Minrick filled his regular appointment at Rock Spring Sunday.

A. W. Jackson was in Eureka Springs, Monday, shopping with Times advertisers.

C. P. Alderson moved onto Tom Gossage's place last week. Good luck to you Mr. Alderson.

Otto McCall's oldest daughter is very low with fever, her friends and parents hope for a speedy recovery.

Try roasting corn on the cob in the oven on cold, blustering days. Cut it up in short lengths and allow the hens to pick it off.

To make hens lay, put some oats in a box, pour warm water over them, and keep in a warm place. Feed a small quantity to hens each morning after the oats begin to grow and get green. Oats soaked in milk are splendid.

KITCHEN KABINET KOLUMN

Busy Housekeeper's Reference Page

Prepare a chicken as for fry, or parboil, then add one Virginia pared potato for each Stew one to eat, a handful of soaked green lima beans, corn cut from two roasting ears, three ripe tomatoes, salt and pepper to taste. Cook in a quart of water an hour and half.

Cold boiled potatoes, and any other vegetable desired Nut that happens to be on Hash hand, may be used. Chop fine, heat quickly in well buttered frying pan, salt to taste, and when thoroughly hot, stir in lightly a large spoonful of nut meal for each person to be served, and serve at once.

Is made by putting the meats through a food chopper Nut with the finest cutter on Meal (I use the nut-butter grinder, screwed on rather loosely), or the nuts may be rubbed through a sieve, but this is, of course, slower work. Any kind of nuts may be used in the various dishes, whichever is most easily obtained.

Select even-sized potatoes, wash and bake them Cut Stuffed off one end, scrape Potatoes out the centers, leaving the skins whole. Mash the potato and season with salt and butter, add a generous portion of nut meat, and return the mixture to the shells; cover the tops with pieces cut off, and serve. Before beginning, all materials should be placed ready at hand, so that the work may proceed rapidly, and the potatoes served while still hot.

Soak a cup of dry Lima beans over night. In the Lima Beans morning slip off With Nuts the skins (which is rapid work as they are so large), put them in the bean pot with plenty of water, and salt to season rather more than when cooked without nuts. Let them cook slowly in the oven until perfectly tender, then add a half cup of nut meal, let cook a few minutes longer, and serve. If preferred, the nuts may be blanched by letting them stand for a few minutes in boiling water, then throwing them into cold water, and then the skins may be easily removed, then put one-half cup of the blanched meats in to cook with the beans.

Take cooked beans or peas and pass them through a Nut colander to remove Roast the skins. Then mix them with an equal amount of finely ground or chopped nut meats, and season to taste. Place one-half of the mixture in a buttered baking dish, and over it spread a dressing made as follows: Pour boiling water over four slices of zwickback cover and let stand for a few minutes, then break it up with a fork and mix with it one-half cup of cream, sage and salt to taste. Cover the dressing with the remainder of the nut mixture, pour one-half cup of cream over all, and bake for one and one-half hours. Cut in slices, and serve with cranberry sauce.

Any owning a few bearing black walnut trees should Nuts in count their product The Menu the most valuable crop raised for home consumption. According to government report, the black walnut is the most nutritious of our native nuts. Being large, it is easily prepared, and being plentiful in the western states, it is cheap and easily obtained. Nut meats are more than twice as nutritious as any kind of flesh foods, and were they made to take its place the gain in health would be incalculable. Nuts may form the foundation of many substantial dishes. Also, it should be borne in mind nuts are a very concentrated food and but a comparatively small quantity of them is needed to what would be needed of less nutritive food. I will give a few recipes for preparing nuts for the table, and any cook can originate other dishes to suit her needs.

The Master of Craven

By Marie Van Vorst Author of "Amanda of the Mill," "Miss Desmond," etc., etc.

Copyright 1904, by J. B. Lippincott Company.

Tempest caught his breath. "You mean you were serious! You came to England to see me, and are going back on the first ship?" "Yes," she said simply.

"But I never heard such a venture! Is all reporting work like that? Seven thousand mile for—" "Success—yes," she finished. "I suppose so. It seemed to them worth it. I should, of course, have succeeded."

"But you have traveled before—you know Europe." "Oh, yes," she said. "I was in school in France. I have traveled, but I have never been in England."

"You must stay," he cried earnestly. "England's a garden—this county especially lovely. Why Pen-then castle is within two miles of me—Raynes and the forest of Raynes."

"I know," said his companion—Here to the west, low shelving to the sea and she repeated one of Tempest's sonnets written 15 years before. Her manner of speaking it was delightful, unadclamatory, understanding, and simple.

There was a moment's silence on the part of the people in the trap. Then the lady said: "But there are other trains, surely, to other stations?" "None either way to-night, m'm," reassured Mr. Ramsdill.

foot on the step of the cart. She close composedly: "Mrs. Ramsdill's, please." "On the long, wet way back he said: "I've been a boor; will you forgive me?"

"You have been most kind, Mr. Tempest." "No—no—tell me, please, you forgive me?" "How can you ask it? I should never have so forced myself—" "You do then—I am obstinate—say the words."

"Well, then, I do, of course, forgive you," Mr. Tempest said. "If I can." The Ramsdill cottage, a type of hundreds of low-ceiled, vine-covered nestling houses, sent out into the rain its one ruddy star through a small window-pane. As the cart approached the door opened and a cheerful beam of light cut into the dark.

"Now," said Tempest, "one more favor, Ramsdill. Can they spare you here to-night? If so, will you drive me back to Craven? I've sprained my wrist and it has been all I could do to get my mare to the Ford."

Lucy Carew opened her eyes the next morning in the blaze of brilliant day. The 10th of November broke in holiday and golden fashion after a night of wild, unusual storm. In the coarse nightdress of her hostess she lay in her clean bed in the country-smelling little attic. She had scarcely stirred to rise when a knock at her door held her motionless.

Mrs. Ramsdill, red-cheeked, bashful-eyed, came in like a bright apparition, for she looked at her lodger over a giant bouquet; the profusion filled her hands. She arrived like Flora. She had a note and gave it. "If you please, miss, from Craven—there's a answer to take."

She regarded with pretty, timid curiosity this handsome young lady who stood well out of the short nightdress, her feet gleaming charmingly displayed below the hem. Above the low, plain collar her neck and dark head rose frankly. Women—beautiful women—do not imagine how much to their beauty's enhancing is sometimes the naive garments of their simple sisters.

Her Worst Fear. Willie—"Oh, mamma, that cook pat sent has red hair, scars all over her face, a breath that smells like whiskey. She looks awful mad and sassy—she wants to see you."

ENGRAVED Copper Plate Cards

This office is prepared to furnish the very highest grade of work in Engraved Cards with Plate and WEDDING WORK

We can supply your wants in the job line from the "dodger" to high class book and pamphlet work

Failed in Health "My mother died six years ago," writes Miss Ruth Ward, of Jerseyville, Ill., "and left me to care for six children. I had never been strong; and this, with the shock of her death, was too much for me. "I failed in health. I was tired all the time and did not want to go anywhere, nor care for company. I had the headache all the time and such bearing-down pains. "A very dear friend advised me to take Cardui, as it had done her so much good, so I commenced to use it and now I am in good health." Take CARDUI The Woman's Tonic Women's pains are relieved or prevented and women's strength is quickly restored, by Cardui, the woman's tonic. You yourself know best if you need it, or not. If you do need it, do not delay, but commence to use it at once. Every day of delay, only lets you slide further down the hill. Don't wait, then, but begin to take Cardui today, for its use, no matter how prolonged, cannot harm you and will surely do you good.
