## HOW TO USE YOUR DIAL TELEPHONE

Suppose you want to call number "3998"

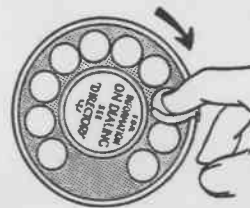

1. Lift the receiver to your ear and listen for the "dial tone," a steady humming sound.

2. Place finger in opening on dial where you see the figure "3." Pull the dial around until your finger strikes the stop.

3. Remove the finger and let dial spin back. Do not interrupt the return of the dial, as connection is set up as it returns to original normal position.

4. Do the same for each of the remaining figures, "9," "9," and "8," in the telephone number.

When you have finished dialing the number, the bell of the telephone you are calling will ring. You will know this by a "burring" sound.

If the line is in use you will hear the **BUSY SIGNAL**. This is a "buzz-buzz-buzz" sound. If you hear this, hang up the receiver and try dialing later. If you make a mistake in dialing, hang up the receiver. Wait a few moments and dial again. Don't hurry. Take the time to dial correctly.

### TO REPORT A FIRE: DIAL "4321"

Dial "3-2-1," and report the fire to the party who answers. The party on 321 will report alarm to firemen. Gain from dialing curiosity calls when the fire siren sounds, as it may encourage calls to the firemen.

GET "INFORMATION" OR REPORT TROUBLE: DIAL "O"

### TO PLACE A LONG DISTANCE CALL:

For calls to BERRYVILLE or HARRISON, lift the receiver, wait for the dial tone," and then dial the figure "8." Give the number for Berryville or Harrison to the operator who answers. This operator will complete your call. For long distance calls to ANY OTHER POINTS except Berryville or Harrison, dial the "Operator" or "O." The operator answering will complete the call for you.

## TO DIAL ANOTHER PARTY ON YOUR LINE

- 1—Lift the receiver and wait for the "dial tone."
- 2—Dial "9."
- 3—Dial "1" (if yours is a one-wire rural line dial "5" instead of "1").
- 4—Dial the last figure of your own telephone number.
- 5—Dial the last figure of the other party's number.
- 6—Hang up your receiver. (Ringing of the called party will not begin until you replace your receiver after dialing).
- 7—Wait for your telephone to ring, and for about 3 seconds AFTER IT STOPS RINGING. (If you lift your receiver before your bell stops ringing, your call may be lost).
- 8—When your telephone stops ringing, it will mean the other party has answered. Pick up the receiver and start to talk. If your bell does not stop ringing after a reasonable time (about 2 minutes) it means the called party has not answered. You can stop the ringing by lifting your receiver for a few seconds. Be sure to hang up the receiver again.

## TO DIAL FROM A PUBLIC PAY TELEPHONE

- 1—DO NOT DEPOSIT NICKEL at first.
- 2—Lift the receiver and wait for the "dial tone."
- 3—Dial your number. You will then hear the ringing tone, an interrupted "burring" sound. When the party you called answers, another tone, a very high pitched hum, will be heard.
- 4—When this high pitched hum is heard, deposit your nickel. This clears the line for conversation. When finished talking, be sure to hang up receiver.
- 5—If the number you are calling is being used at the moment, you will hear "buzz-buzz-buzz" sound. If you hear this, hang up the receiver and dialing again later.

## TELEPHONE REPRESENTATIVES: EUREKA DRUG COMPANY

54 Spring Street, Telephone number 2121, please make payments of bills at this address. This representative will also handle requests for replacement and repair parts for rural line telephones and equipment.
